

PREMIUM CARE

END-OF-LINE
CONSUMABLES

The background of the slide features a large roll of clear plastic film on the left and a blue and white bag of white plastic granules on the right. The bag has the text 'PREMIUM CARE' and 'SYSTEM Group' on it. The foreground is covered with a pile of these white granules.

Leader in the supply of consumables for end-of-line

- Glues and waxes
- Polypropylene and polyester straps
- Shrink and stretch plastic film, stretch hood film
- Other materials for industrial use

Putting your trust in Premium Care means guaranteeing quality in every end-of-line phase, from the sorting process to packaging and palletization.

Customer-oriented

Premium Care provides a complete, **customer-oriented** consultancy and supply service, aimed at satisfying every end-of-line requirement in a rapid and efficient manner.

At your side, everywhere, always

A global presence, stock in loco and specialized technical support allow Premium Care to accompany you always and everywhere in rapid time.

Hot melt glues

(EVA and metallocene based), scratch-resistant **waxes** and **polymers** and cleaners for industrial systems

Excellent gluing performance

Besides the supply of glues, waxes, polymers and cleaners, Premium Care guarantees **technical support** and offers a **calibrating service for gluing systems** and **control of consumptions** by highly qualified staff.

ADVANTAGES OF PREMIUM CARE'S HOT MELT GLUE

- Reduction in the level of carbonization • Self-cleaning properties
 - High adhesive properties • Lower product quantities
- Resistance to heat and cold • Wide range of applications
 - Clear color and odorless

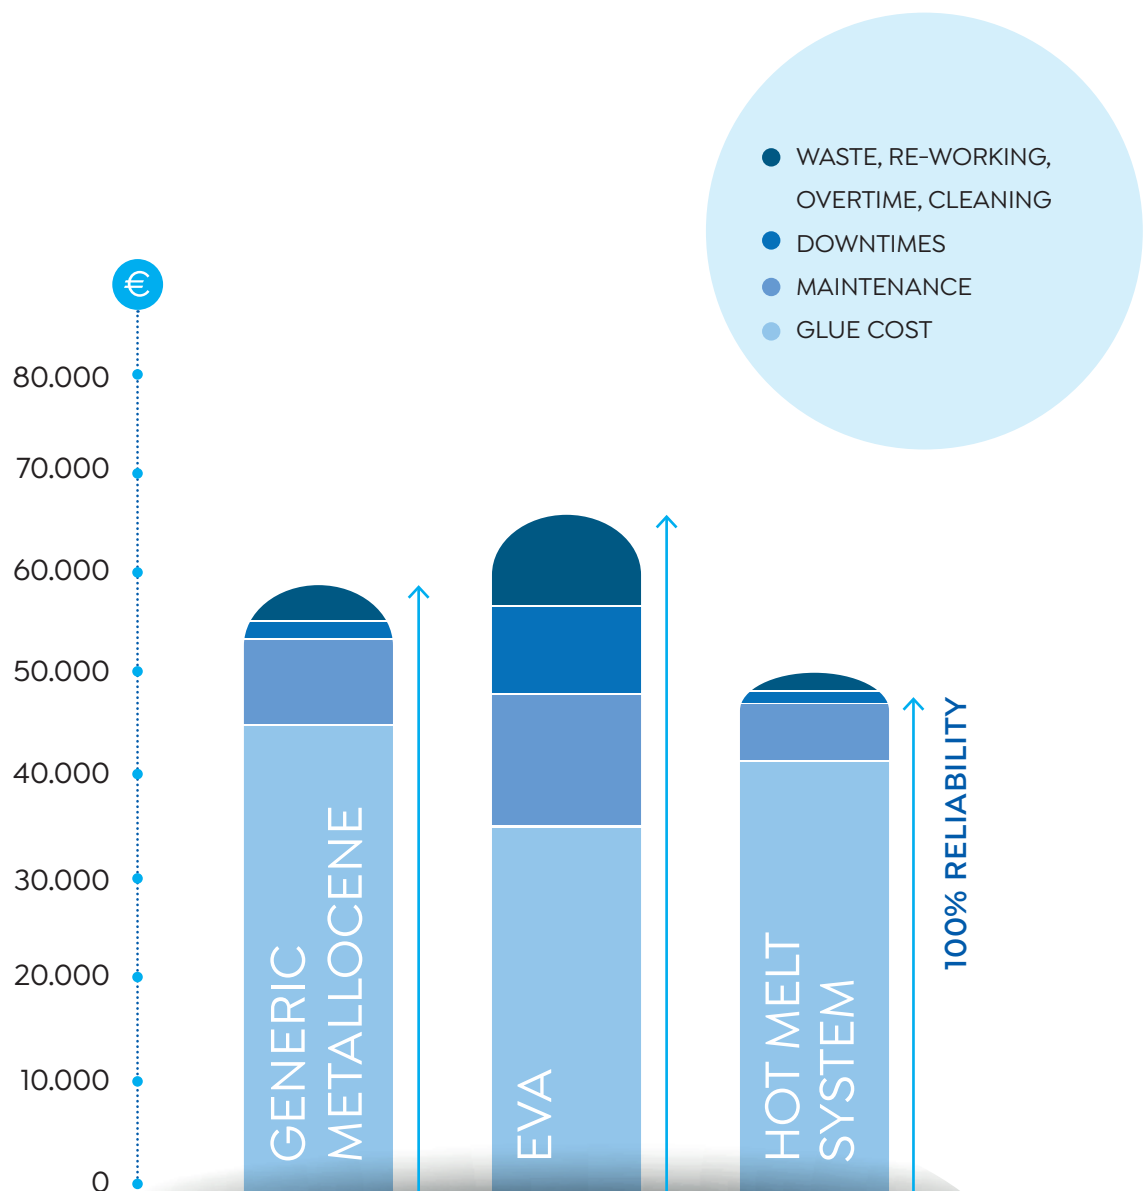

9

REDUCTION OF MAINTENANCE COSTS OF **UP TO 50%**

	E.V.A.	METALLOCENE
RENEWAL OF TUBES	Every 3 years	Every 6 years
CHANGE OF ADHESIVE PUMPS	Every 3 years	Every 6 years
CHANGE OF DISPENSING NOZZLES	Every 2 years	Every 4 years
CLEANING NOZZLES	Every 3 months	Every 6 months
CHANGE OF FILTERS	Twice a year	Once a year

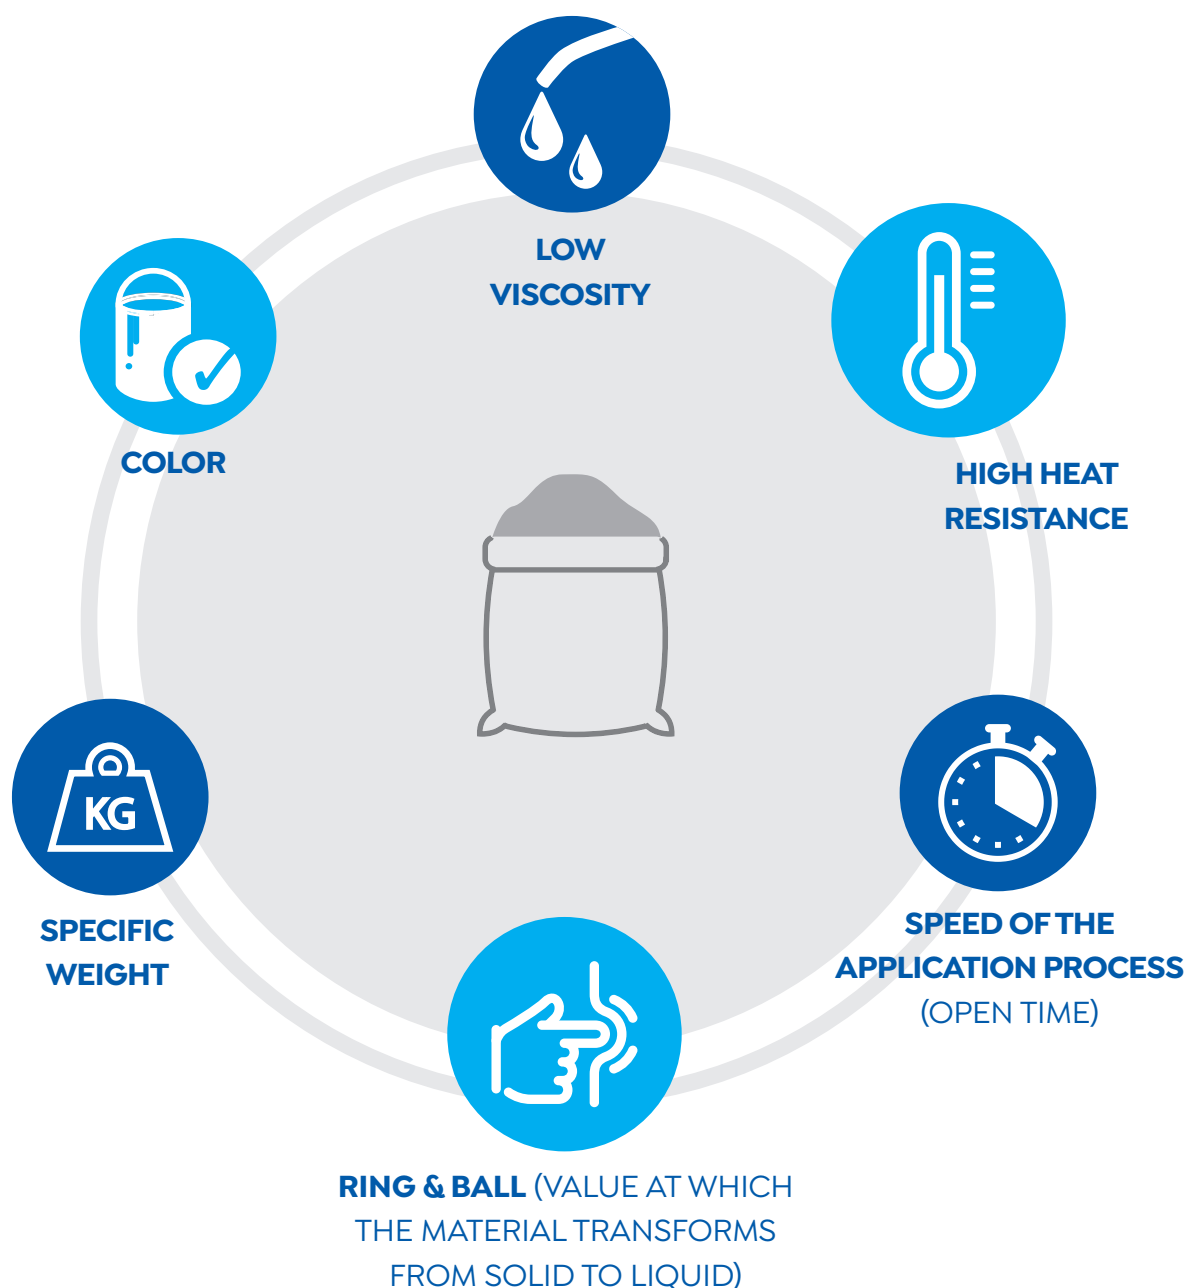

How much you **can save**

Annual estimated costs for production sites with 4 machines.

The graph shows how **Premium Care's Hot Melt glue**, which includes Metallocene, Eva and new synthetic polymers, has a **lower economic impact** compared to the two main glues present on the market, while maintaining **high qualitative standards**.

FACTORS TO BE TAKEN INTO CONSIDERATION WHEN CHOOSING THE IDEAL PRODUCT:

Shrink and stretch plastic film, and stretch hood film

Maximum protection in packaging

Premium Care provides coils of any thickness for automatic machines, hoods or pallet covers of various dimensions, suitable for every packaging need.

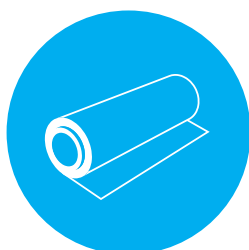

Shrink-wrap hoods and pallet covers are made with **30% of recycled plastics**, permitting a **saving of 7.5%** compared to other products present on the market.

13

Thanks to Premium Care's attentive customer support, customers are able to reduce costs and increase productivity and carry out the packaging phases in a more efficient manner.

Every type of packaging can be customized further to the customer's request, on the basis of:

• **thickness in microns** • **dimensions** • **resistance to UV.**

Polypropylene and polyester straps

14

High levels of fixing, sealing and reliability

Valid alternatives to metallic strapping, the polyester and propylene straps are effective for medium and light palletizing, ensuring constant and safe tightening during every handling phase. **Available in any size and customizable** by request, they are suitable for automatic, semi-automatic or manual use.

15

Premium Care offers polyester straps also for large formats of industrial ceramics and provides technical support for the use of alternative products.

Tools for brushers

16

Goodbye to dust and impurities

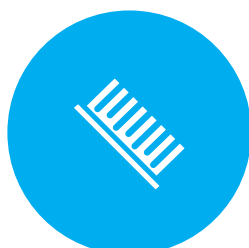

Suitable for smooth or structured surfaces with different resistance to dirt,
Premium Care tools allow light and uniform polishing.

- **Reduced dimensions** for simple handling
- **Bayonet fitting** for easy and swift replacement
- **Various types of filaments** to optimize the elimination of dust or other impurities
- **Tools made with abrasive material** to reduce the surface roughness of the tile surface
- **Customization of the tools**, made ad hoc.

17

TYPES OF BRUSHES

MATERIAL	NAME	COLOR	CHARACTERISTIC
BRISTLE	FLEX	YELLOW	Flexible, removes dust from structured surfaces.
BRISTLE	FLEX	WHITE	Flexible, removes dust from delicate surfaces.
BRISTLE	FLEX	GREY	Flexible, removes dust from structured surfaces. Slightly abrasive.
FIBER	SOFT	WHITE	Removes dust from planar surfaces.
ABRASIVE	MEDIUM SOFT	BLACK	Slightly lowers surface roughness and dusts the surface.
ABRASIVE	MEDIUM	RED	Lowers surface roughness and dusts the surface.
ABRASIVE	MEDIUM HARD	RED	Lowers surface roughness and dusts the surface. Greater hardness and duration.

Customized logistics services

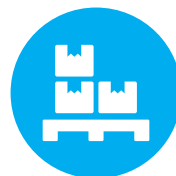

Premium Care makes use of specialized partners in logistics in order to ensure its clientele **the best delivery cost/time ratios** on the basis of specific business needs.

Premium Care is able to make **shipments throughout the world**, directly or through System branches, without limits of weight, dimensions and volume, **from a single package to a container**, supporting the customer also in the processing of paperwork.

19

**SHIPMENTS OF
SINGLE PACKAGES**

**MULTI-PACKAGE
SHIPMENTS**

**VOLUMINOUS
SHIPMENTS**

**CONTAINER
SHIPMENTS**

Tracking, flexibility, rapidity, transparency and quality are the characterizing features of Premium Care's delivery service.
